STATISTICAL REPORT

Volume VII

Prepared by John Vosejпка

FOREWORD

It's hard to believe that another conference basketball season has passed--but it has. For the seventh consecutive season, I have compiled a statistical report recapitulating the highlights of the just completed season. This report is the culmination of over 150 hours of viewing games, compilation, typing, mimeographing, and binding. I hope that you truly appreciate the time, effort and pride that I have placed in this report.

This report is, by no means, the effort of just one individual. My thanks go to every coach (and assistant) in the conference for their assistance in submitting the game summary reports to me. My thanks also to "Lefty" Gilleland for his cooperation. Without the help of all that I have mentioned, this report could never have been produced.

As I have stressed in previous reports, my sole objective in compiling the statistics for the conference has always been to give every player and coach in the conference some sort of recognition (which they all deserve) and to give special recognition to those that excel in a particular category. One must always remember that a player's ability cannot, and should not, be measured solely on his statistics.

As I reflect back upon the just completed season, I have mixed emotions about its conclusion. The season was the first ever in the 72 year history of conference basketball that did not see a Mechanic Arts team participate in. It saw the end of Monroe's 36 years of participation in the conference. Next season the conference will see the addition of three schools (Cretin, Hill-Murray and St. Thomas Academy). I hope that these schools will totally appreciate the honor of being associated with the St. Paul City Conference. A conference rich in tradition, pride, and prestige.

John A. Vosejka

STATISTICIAN'S NOTE

With Mechanic Arts no longer in existence, the conference played sixteen games less this season. For this reason, it is impossible to compare this season's stats with those of last year. I, therefore, was forced to use a percentage of the average statistic to replace the void of the sixteen games. Seasonal increases or decreases that have been affected are denoted with an asterisk ().*

I feel this is the only way that a true comparison of the two seasons is possible.
